

Dropbox brings your tools and content together

The new Dropbox experience brings together all the content and tools you want to use. Now you can access more powerful features of Slack and Zoom and bring context to your communication.

Dropbox and Slack Integration

Reduce steps

Easily share files from within Dropbox to people and channels in Slack with just a few clicks.

Give people context

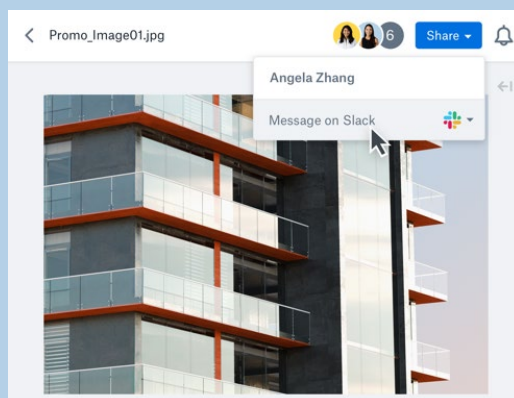

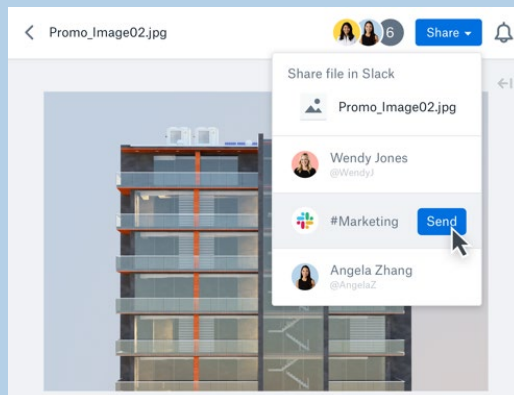

Start a Slack conversation from Dropbox to discuss changes or updates to shared content.

Preview shared Dropbox content

See what a file is about right in your Slack channel or conversation without having to open it first.

Stay on top of work

Keep track of where work has been shared by seeing Slack activity alongside your files.

Dropbox and Zoom Integration

Stay focused

Seamlessly join a Zoom meeting from within Dropbox to discuss the content you're working on. No need to step away from one platform to another to get a conversation going.

Add video meetings from Dropbox

Connect your calendar and easily add Zoom meetings from right inside Dropbox to collaborate on content.

Share content in real time

Present content directly from Dropbox to a Zoom meeting and avoid having to move from one platform to another.

View what files have been shared via Zoom

Keep track of all your work in one place, with files shared to Zoom from Dropbox appearing in the Dropbox activity feed.
