

Experience

THE POWER OF AUDIO

EPOS

About EPOS

EPOS designs, manufactures and sells pioneering premium audio and video solutions for business professionals and gamers.

- Owned by the Demant Group
- Headquarters in Copenhagen, Denmark
- Builds on more than 115 years of audio expertise
- Operates in a global market with offices and partners in more than 60 countries

2003

Sennheiser KG and Demant A/S start the 50/50 joint venture

2019

Demant Group takes 100% ownership of Sennheiser Communications

2020

EPOS is officially launched

95%

of today's modern workers admit that their concentration and efficiency at work has suffered due to sound issues.

Our Brain Is Not Built for Artificial Sound

This leads to
symptoms such as:

- Concentration loss
- Tiredness
- Stress

We hear with our
ears, but we listen
with **our brain.**

EPOS

To perform our best and reduce cognitive load at home or at work, we need to help the brain adapt to artificial sound.

What makes EPOS different?

We understand that you hear with your ears but listen with your brain. Through our science-based approach to sound excellence we enable you to focus and perform better with less brain energy spent, allowing you to:

Stay focused for longer

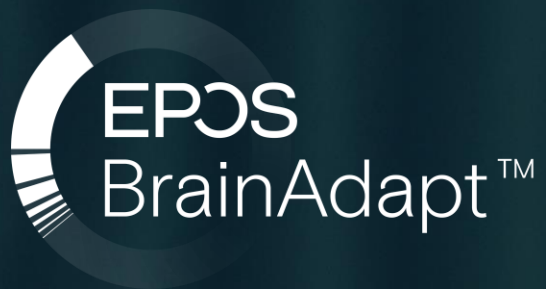

Improve concentration

Reduce stress and listening fatigue

EPOS

Audio Designed for Your Brain

- Building on decades of world-leading research through Demant on how the brain perceives sound
- EPOS BrainAdapt™ is a group of pioneering technologies that work together to improve cognitive performance
- Headsets, speakerphones, and video bars that are built on EPOS BrainAdapt™ technology are designed to support the brain's natural way of processing sound. This means less fatigue and more focus for both you and the people you are communicating with

EPOS

Putting Cognitive Performance at the Forefront of Everything We Do

Finetune acoustics and algorithms to benefit cognitive performance

- Defining the sound profile for the best brain performance
- Implement technical features into product portfolio that reduce cognitive load
- Scientific research to measure brain activity

Adaptive Active Noise Cancellation

- Full control of your sound environment
- Real-time ANC

Improve Performance Through World-class Speech Intelligibility

State-of-the-art Voice Pickup Technology

- Excellence in microphone performance
(e.g., EXPAND 80 speakerphone)
- World-leading speech-in-noise processing
(e.g., ADAPT 660 headset)
- EPOS AI™ and the Learning Lab
