

Wholesale Distribution

Improve supply chain management and increase margins with our wholesale distribution solution.

Wholesale distribution companies are challenged to find new ways to cut costs, improve margins, and efficiently manage inventory. In today's environment, fierce competition is the norm and meeting your business goals can become an uphill battle.

Spire understands your unique set of challenges and our solution is designed to give you the competitive advantage you need to succeed.

Here's how your distribution business will benefit with our software:

Efficient Inventory Management

- Improve replenishment with accurate tracking using reorder points and requisition from inventory, sales and production

Lot Traceability

- Track incoming and consumed raw materials
- Best before/expiry date tracking
- Easy management of product recalls

Optimize Warehouse Control

- Workflow and process automation with sales order status and phases
- Enhance operational procedures and improve productivity with filters, searches and reports

Streamline Order Fulfillment

- Automate manual processes
- Identify and eliminate bottlenecks with reports that tell you what is ready to ship and when it is required

Gain Visibility

- Reporting tools to monitor key indicators
- Real-time data for better decision-making

Integrated Accounting

- Full integration with AR, AP, GL, and Account Reconciliation modules
- Track purchase and sales orders
